Recent Disclosures Are Equiva- Both Local and Nevada Stocks Show Time for Loading and Unloadlent to the Development of

moved away to a point where it was be-lieved the ores would go deeper before reaching the granite. The new hole is going down to beat the band, and it is evident that the ore is still richer, for one of the men told me before I left camp that, while he did not know how the material assayed, 'the whole thing appeared to be metal.'

at the mouth of the tunnel and the chutes through which the ore is drawn off, a busy scene is always presented, for the trains are loading and pulling out with such rapidity that one becomes confused in watching them. If the company is not mining and plucing its ore at the mill for mining and placing its ore at the mill for

LEDGE CUT IN TETRO.

Strike Is Made That Should Prove Important.

Important.

A message from the Tetro company's property at Tintic yesterday afternoon brought the cheering information that, at a distance of some 300 feet out from the new working shaft, on the 555-foot elevel, a quartz ledge had been encountered and that the material broken into looked good. Additional information concerning the value of the strike is expected today, after time enough has elapsed to allowed the workmen to get a few feet farther into the ore. The news of the strike came from Robert Brown, under whose supervision the development of the mine is progressing.

As near as it was able to judge yesterday afternoon, the fissure is the same as that which proved productive of fine ore in the old upper workings and on that account everybody connected with the company who heard of the strike late in the day were feeling in a pretty good humor. For more than a year past the company has been opening up the mine through the shaft that it was then decided to sink in order to avoid the great expense of operating through the old to the strike of the strike of the strike that it was then decided to sink in order to avoid the great expense of operating through the old to the strike of the strike of the strike of the store.

through the shaft that it was then decided to sink in order to avoid the great expense of operating through the old tortuots tunnel and the winzes that were sunk from it. Assessments have been regularly levied and that they have been promptly paid without a murmur indicates the confidence which the shareholders have in the property. When the news came vesterday afternoon the price of the stock on the mining exchange jumped from 14½ to 25 cents a share, with a closing sale at 23 cents.

CON. MERCUR DIVIDEND.

Usual Quarterly Payment of \$25,-000 Is Ordered.

The directors of the Consolidated Mercompany met yesterday and posted usual quarterly dividend of \$25,000, or the usual quarterly dividend of \$25,000. or 2½ cents per share. It was made payable on Sept. 25 to shareholders of record at the close of business on Sept. 8. As the report of the last fiscal year's operations by the company is now ready for the printers, the presumption is that it will be ready for mailing to the stockholders at least by the time the dividend checks are issued. That it will show a good year's business, is a foregone conclusion, and that it will hold out a great

It may be a little early to talk about what your home ought to look like this winter, but it isn't as far off as you may think. Better come in and talk it over with us now.

MORRISON, MERRILL & CO.

28 Main St.

come is just as certain.

The Consolidated Mercur company has struck a gait that takes it entirely out of the realm of speculation. It is producing at a steady and most conservative pace and there are few corporations over a struck of the realm of speculation.

and there are few corporations engaged in the mining business that are conducted on more economical yet thorough business principles.

MINING STOCK EXCHANGE.

Some Good Advances.

STRIKE MADE IN THE TETRO

CON. MERCUR'S QUARTERLY DIVIDEND IS POSTED.

Information from Newhouse, in Beaver county, is to the effect that the Cactus property of the Newhouse Mines & Smelters corporation is developing into one of the biggest bonanza properties in this country. Lorin Morrison, manager of the Newada list is fast acquiring a list of the market in prime condition and fairly active. Some of the local stocks moved up; some of the Newada list did likewise. Sunnyside, of Thunder Mountain, was called for the first time and, while no sales were reconded, the offered price shows that the merits of the proposition are pretty well understood here. During the day a total of \$26,512.37, changed hands.

Daly-Judge again came out sparingly at \$11.87½, while Alice of Butte, sold 400 shares at \$3. Daly was taken into camp at \$1.37½ and Beck Tunnel at 88c to 89c. The dealings in Lower Mammoth were at 45c to 54c, indicating that a change is taking place on the 1,700-foot level. Tetro was at 14½c bild in the morning. In the afternoon it did business at 20c to 25c, the advance being due to favorable reports from the mine during the after noon.

The Nevada list is fast acquiring a

HITS SAMPLERS

ing Cars of Ore at Mills and Smelters Cut in Two.

with the production of the companies and the com

discontinued, and that but two (2) vs, or forty-eight (48) hours' free ne would be allowed, as provided in rules and regulations of the Utah Service association on file with the

e for loading and one period of free Parrot .. for unloading under one trans-

it to the smelting company buying it, is the best that can be done, on an average. It is not always possible to sample a car of ore or a number of ears the day it or they are received owing to the position of possibly dozens of other cars that have accumulated After a sample is made, the assayers have frequently to make analyses of the pulp in addition to the ordinary determinations of the amount of metals in the ore. Then it takes a day to get bids from the different smelters, and if the whole business is done with the utmost dispatch it is about all the mills can do to divert the ore before demur-

Sampler Managers' Opinions. "It looks to me," said Manager, C. D. Rooklidge of the Pioneer works, "as though the public samplers would have to go out of business if the new rule is enforced; either that or the producers will have to stand the demurrage costs. It appeals to me as being in the nature of a direct blow at the mining industry, and I look to see the producers up in arms over it soon. The matter will undoubtedly be referred to the Commercial club's committee on mines and mining, and that the railroads will hear

from it there is no doubt.' David W. Brunton, of the Taylor & open market, as reported by McCornick & Co., yesterday, amounted to \$75,000, his opposition to the new rule and he declared that it would mean a serious blow to the industry of mining in this region, which is just now leaping to the front with such bewildering speed. He believed that, if the rule was not modified, it would eventually result in the utter destruction of Salt Lake as a competitive ore selling and smelting center, and that mills and smelters would become scattered all through the west. It would affect many lines of business here and retard the growth of

The Railroad View of It.

Commissioner C. H. Griffin declined to take any such gloomy view of the enforcement of the rule. He declared May Day, 2,000@13c. Nevada Hills, 100@\$3.10, seller 30; 400@ that the manner in which the sampling men and smeltermen took advantage of the rule as it applies at the present time has been scandalous and that no harm will accrue to the producers, the samplers or the smelters, either, for that matter.

"In the first place," said he, "the de-murrage charge which, under the fourday rule, is \$2 a day for each car not released on time. Under the new rule the charge is reduced to \$1 a day on each car held over the limit of two days. I have figures in plenty to show days. I have figures in plenty to show sampler yesterday morning. that the sampling mills do not ray very much for demurrage and then Kennebec company's mines at Alta, was only when breakages or something looking after interests in the Big Cottonappens at the mills to throw them behind with their work. Recently, on account of the mills receiving more business than they have had the facilities to handle, they have been caught for more than ordinary amounts of demurrage, but that, I believe, can be easily escaped by increasing their yard,

bin and mill facilities.

Yankee, 100@33c.
Goldfield Mining. 1,200@58c.
Mohawk, 100@\$3.75; 100@\$4.00; 400@\$4.10; of the four-day rule. Sometimes, to illustrate, a car of ore is sampled at Topopah or Goldfield and the car is Additional Mining News on Page 8. held four days there; then it is decided to resample it at Reno, maybe, where another four days is taken. Then the car comes to Salt Lake and it is ordered resampled here and another four days is consumed. After that it is four days is consumed. After that it is released to one of the smelters and, if their yards are congested or there is for rent. Badger Bros., 34 Main st.

Mo. Pacific 67,500
M., K. & T.... 14,600 released to one of the smelters and, if

some particular place that the ore is wanted it is held there until the four days' free time has expired. In this days' free time has expired. In this large are tied up for weeks just to smeitermen and the railroad is charged with not having cars enough to handle its patrons' business.

"It is not in my province to speak for the railroad companies, but I am sure that there is no thought of doing anything to cripple the mining industry; no one is more interested in seeing it prosper than the great transportation companies. This demurrage proposition with the samplers and smelters will work out all right."

Mining Notes.

Manager Tony Jacobson of the Columbus Consolidated was at Wasatch yesterday looking after company matters. A. J. Smith, a Goldfield operator, who is headed east on business connected with propositions with which he is identified, was in the city yesterday.

George H. Dern, general manager of the Consolidated Mercur company's prop-erties, was in the city yesterday attend-ing the meeting of the directors. Four carloads of ore from Alta, three from Tintic, two from Bingham and one from Nevada were reported at the Pioneer sampler yesterday morning.

Manager Solon Spiro of the Silver King Consolidated will run out to the mine to-day to size up conditions. Good reports are beginning to come from there and he wants to see what is doing.

W. J. Craig, general manager of the wood side on Sunday. He says the rains and cloudbursts made the day a most pleasant one—for people not compelled to be out in the storm.

Manager William Hatfield of the Albion was in the city yesterday after a visit to that Alta proposition. He says the mine is now practically drained and sinking from the upper workings, as well as raising from the lower tunnel, will now be pushed till connections are made. The distance to cover is 160 feet, and it is not expected that it will require many weeks to make connections and get down to mining. and get down to mining.

Stock Broker. Tel. Bell 792.

Nearly 3,000,000 Shares During the Session.

MILL MEN ARE PESSIMISTIC Colorado Fuel & Iron Experts in the MARKET IS PROFESSIONAL

active list selling from one to three points below the day's best figures. Opinions as to London's participation in this market differed, early reports telling of profit taking sales, while later it was declared that the day's business showed purchases on balance. The strength of the copper stocks here was doubtless a reflection in part of the higher prices quoted for the metal in London. In addition to the stocks named, new high records were made by St. Paul preferred and Chesapeake & Ohio. The sub-treesaury at the close of business today reported payments aggregating \$23,000,000 for account of the new Panama bonds. Many railway returns were made, chiefly for the month of July. Marked gains in gross earnings were reported by Louis-ville & Nashville, Canadian Pacific, outhern Pacific, "Soo" and Grand Trunk. Sales of bonds for the day were in keeping with the heavy business in stocks, amounting to \$4.745,000.

wethers, 4.50@6.00; fed ewes, 4.25@5.50.

GRAIN AND PROVISIONS.

Chicago. Aug. 20.—Strength in the wheat market developed after trading was well under way. Early in the session sentiment was quite bearish because of lower cables, fair weather in the United States and an increase in the world's movement. Pit traders were the principal sellers during the first hour. Toward the middle of the session some bullish dispatches were received telling of damage to wheat in the northwest. One report estimated that the yield of spring wheat would be reduced 5 to 10 bushels per acre because of

excessive heat. These advices started lively bidding by shorts, but the demand met with only small offerings. The result was a rapid advance in prices. The change in sentiment was aided by an advance of ½ to 1 cent in the price of cash wheat at Kansas City, which was due largely, it was said, to smaller receipts. Another feature that favored the bulls was a reduction of 20 per cent in primary receipts, compared with those of the corresponding day a year ago, total arrivals today being \$30,000 bushels, against 1,045,000 bushels last year. The market closed strong with prices altrost at the highest point of the day. September opened % 1/2 lower at 60%, 66%, sold off to 69%, and then advanced to 71½ 671%. The close was % 1 cent higher, at 71½ 71½.

The close was %@1 cent higher, at 71½0 1714.

Increased receipts and ideal weather for the rapid development of the new crop caused weakness in the corn market early in the session. September closed at 48, unchanged from Saturday.

After an easier start the oats market developed a strong undertone on covering by shorts. September closed ½ up, at 20%.

Despite a 10-cent advance in the price of live hogs, the provisions market was inclined to weakness early in the day. At the close September pork was up 5 cents, lard was 2½@5 cents higher and ribs were 12½ cents higher.
